

Wastewater Utility Green Power Report

November 2014

Electricity Generated this month: **67,514 kWh (kilowatt hours)**

This amount of electricity would have cost **\$6,076** if it had been purchased from Duke Energy.

No grease were processed in our digesters for the month.

30 tons of food scraps were processed this month.

18% of our plant's power was generated on-site this month.

The City of West Lafayette's Wastewater Utility has pledged to generate at least 10% of its electricity on-site in 2014 as Indiana's first wastewater plant to become an EPA Green Power Partner.
